

There are four seasons in the UK:

- Autumn
- Winter
- Spring
- Summer

In the UK, the weather and amount of daylight changes across the seasons.

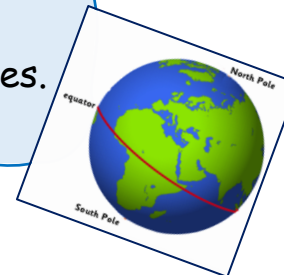

Sunshine, cloud, wind, rain, snow, thunder and lightning are all types of weather.

Year 1: Lost & Found

We can observe the weather to see how it changes.

The North and South Pole are cold climates. Countries near the equator are hot climates.

In hot climates, near the equator, we wear clothes to keep us cool but in cold climates we wear clothes to keep us warm.
