Information for Parents regarding COVID19 Contact Tracing over the Half Term Holiday

Dear Parents/Carers,

I am writing to clarify the expectations around reporting cases of COVID19 and undertaking contact tracing over the half term holiday.

Schools have been supporting the tracing of close contacts throughout the pandemic. One way in which they have done this is by undertaking contact tracing on behalf of the Essex Contact Tracing Team. They identify any individuals who have been in close contact at school with someone who has tested positive for COVID19, during the time that is considered the contagious period. This is from 2 days before the person's symptoms are displayed. Those individuals are then required to self-isolate for 10 days because they are at risk of having contracted COVID19 and being contagious themselves.

This contact tracing will not be taking place in the usual way during the half term holiday when schools are closed and there is less chance of school-based contacts existing.

Please follow the instructions below if your child begins to show symptoms of COVID19 during the half term holiday. It is vitally important that you follow these instructions to help minimise the spread of COVID19.

If your child develops symptoms of COVID19 within 48 hours of being in school (up to and including Sunday 14th February until 6pm)

You must seek a test for your child and the household must isolate at home until the test result is returned. You should let your school know that this has occurred.

The quickest way to obtain a test is to book a test at your local testing centre via <https://www.gov.uk/get-coronavirus-test>. Please do not use postal tests unless absolutely necessary as these take longer.

If the test result is positive for COVID19, you must inform your school, who will identify if there are any other individuals within the school community who are impacted by this.

If the test result is negative, you should inform the school and you do not need to take any further action.

You should contact me at ceo@purleigh.essex.sch.uk as soon as the result is known so I can track contacts and inform them that they need to self-isolate.

You must provide the following: Child's name, year group, a contact phone number and the date of symptoms starting.

If your child develops symptoms of COVID19 more than 48 hours after their last day in school (from 6pm on Sunday 14th February)

You must seek a test for your child and the household must isolate at home until the test result is returned.

If the test result is positive for COVID-19, having developed symptoms more than 48 hours since being in school, (Monday 15th February 2021) you must contact NHS Test and Trace and follow the advice given by them: www.nhs.uk/conditions/coronavirus-covid-19/testing-and-tracing/

You should contact the school if your child will be absent, in time for the first day after the half term holiday.

If your child has no symptoms of COVID19 but tests positive within 48 hours of being in school (up to and including Sunday 14th February until 6pm)

It is important to follow the guidance around accessing a test only when the individual is showing signs of COVID19. However, if your child is asymptomatic and returns a positive test result within 48 hours of last being in school, please let the school know straight away.

You should contact me at ceo@purleigh.essex.sch.uk as soon as the result is known so I can track contacts and inform them that they need to self-isolate.

You must provide the following: Child's name, year group and a contact phone number.

If you are contacted by the school because your child is identified as a close contact of someone who has tested positive for COVID19, they must self-isolate for 10 days.

I would encourage you to adhere to social distancing and all COVID19 social mixing guidance for the remainder of term to reduce the risk of transmission of the virus as the last thing we want is anyone being unwell or required to self-isolate over the holiday period.

To summarise, if your child develops symptoms of COVID19 over the weekend of 14th and 15th February and a subsequent test result is positive you **MUST** contact me. If they develop symptoms after the weekend of 14th and 15th February and a subsequent test result is positive, you do not need to contact me.

Thank you for your cooperation and ongoing support.

Yours sincerely

Mr Joseph Figg

Executive Headteacher
